

Software Quality Engineer

Shehab Magdy

Test Automation Lead with 10+ years of expertise in automation frameworks, test strategy, and quality gates for enterprise ERP systems and AI-driven platforms. Proven track record leading cross-functional teams and driving continuous improvement in Agile/CI-CD environments.

Education

Diploma in Information Technology and Business — 2019
Faculty of Computer Science, Ain Shams University.

Bachelor of Commerce (Accounting) — 2007
Faculty of Commerce, Ain Shams University.

Experience

Senior Software Quality Engineer / Test Automation

G2k >> ServiceNow 1/Feb/2018 - 31/Mar/2026

Led quality engineering efforts for large-scale enterprise and AI-driven platforms deployed across Egypt and Europe, including ticketing systems (Al-Ahly, GEM, ZED Park) and Parsifal (SmartOps) AI alarm solution for Lidl stores.

Key Responsibilities & Achievements:

1. Led automation strategy for Web/API testing in Agile environments; designed scalable frameworks for functional and regression testing.
2. Authored comprehensive test plans and collaborated with development teams to identify root causes and define preventive solutions for critical production issues.
3. Acted as QA focal point across cross-functional teams (20+ members), supporting release readiness and risk assessment.
4. Mentored and onboarded QA engineers on automation best practices.
5. Validated integrations with VMS platforms ([Qognify](#), [iOmniscient](#), [Milestone](#)) and AI-based alarm systems.

Senior ERP Implementer & QA

Bartech-Egypt

1/Jun/2017 - 15/Nov/2017

Led ERP implementations and quality validation initiatives for multi-branch pharmacies, retail stores, and manufacturing clients across Egypt and KSA.

Key Responsibilities & Achievements:

1. Led ERP implementations and quality validation initiatives for multi-branch pharmacies, retail, and manufacturing across Egypt and KSA.
2. Designed and executed test planning for ERP implementations; conducted functional validation and GAP analysis to identify customization requirements.
3. Gathered and documented business/technical requirements from stakeholders to ensure alignment with client processes.
4. Delivered executive product demonstrations and structured training programs for client teams.

Senior ERP Implementer & QA

OriginalBS

1/Jan/2012 - 30/May/2017

Led ERP and POS system implementations for multi-branch pharmacies and retail stores across Egypt, with ownership of requirement analysis, test strategy, and release validation.

Key Responsibilities & Achievements:

1. Designed comprehensive test plans and test cases; executed functional and regression testing to ensure production readiness.
2. Conducted GAP analysis and gathered/documented client requirements, translating them into validation scenarios.
3. Led end-to-end software deployments on servers and client environments.
4. Designed and delivered product demonstrations and customer training programs.
5. Developed SQL stored procedures to generate operational and analytical reports.

Leadership

- Led QA team of 8 engineers: defined test strategy, quality gates, and release validation.
- Coordinated across 20+ cross-functional team members (developers, product owners, DevOps) and 50+ developers to align on quality standards.
- Mentored junior QA engineers and conducted peer reviews for automation test cases.
- Drove continuous improvement initiatives to enhance defect detection and reduce regression risk.

Communication

- Acted as the primary QA point of contact for stakeholders and engineering leadership.
- Communicated testing progress, risks, and release readiness through structured reports and metrics.
- Facilitated defect triage meetings and root cause analysis discussions.
- Translated business requirements into test scenarios and validation criteria.
- Ensured clear documentation of test plans, defect reports, and quality metrics.

Senior Technical Support Engineer & Database Administrator

CompuScope

1/Sep/2007 - 31/Dec/2011

Provided end-to-end technical implementation, database administration, and infrastructure support for enterprise clients across Egypt, including multi-branch pharmacy chains.

Key Responsibilities & Achievements:

1. Led software, database, and OS deployments across 15+ multi-branch client environments.
2. Designed and implemented cost-effective backup and disaster recovery solutions for 3 large-scale enterprise clients.
3. Engineered network infrastructure solutions to resolve connectivity and performance issues; administered production databases with performance tuning and optimization.
4. Ensured server, workstation, and network security; installed and validated OS/database updates.
5. Delivered technical training programs for new hires and support staff.

AI & Generative AI Skills

- Completed formal training in Gen AI and prompt engineering; integrated AI into daily workflows to accelerate development and improve quality.
- Leveraged GitHub Copilot, Windsurf, ServiceNow GenAI, ChatGPT, and Claude for code generation, technical documentation, workflow automation, and data analysis.
- Developed custom Claude skill to automate test case generation for SmartOps scenarios.

Core Competencies & Technical Skills

Test Automation & Quality Engineering

- Automation Framework Design (Selenium, PyTest, JUnit, TestNG, Cucumber).
- Web & API Test Automation (Postman, SoapUI, RestAssured, Playwright, JMeter).
- Functional, Regression & Integration Testing.
- Test Planning, CI/CD Integration, Defect Management & Root Cause Analysis.

DevOps & Infrastructure

- Docker.
- Kubernetes.
- CI/CD pipelines.
- Linux/Windows.
- VMware, VirtualBox.

Tools & Platforms

- Version Control: Git, GitHub.
- ALM: TFS, Bugzilla, Mantis.
- IDEs: VS Code, IntelliJ, PyCharm, Eclipse.
- Enterprise: ServiceNow, SmartOps.
- Collaboration: MS Teams, Miro.

Leadership & Professional Strengths

- Cross-functional team leadership.
- QA mentoring.
- Stakeholder communication.
- Risk reporting.
- Analytical problem-solving.

Programming & Scripting

- Python.
- Java.
- .NET.
- TypeScript.
- SQL (DML, PL/SQL).
- HTML/CSS/JavaScript.

Databases & Reporting

- MS SQL Server.
- PostgreSQL.
- MySQL.
- Sybase.
- Crystal Reports.
- Query optimization.

Languages

- Arabic (Native).
- English (Professional).
- German (Conversational).
- French (Basic).
